## Test Plan

#### ● 測試範圍:

社群網站 Socify (http://140.124.183.106:3000/)上可操作的功能如下列所示:

#### Account

1. Log in

#### Event

- 1. Create an event
- 2. Edit an event
- 3. Delete an event
- 4. Like an event
- 5. Unlike an event

#### Comment

- 1. Write a comment
- 2. Delete a comment

#### Status

- 1. Create a status with add images
- 2. Edit a status
- 3. Delete a status
- Find friends
- Edit profile
- 測試方法: Input space partitioning (ISP) Each Choice
- 測試終止條件:每個功能至少達成一個Happy Path (Pass)
- 測試環境:
  - o Python 3.6.1 32-bit
  - o Selenium
  - PyCharm (IDE)
  - Win10 64-bits (OS)
  - Chrome版本 58.0.3029.110 (64-bit)
  - o ChromeDriver 2.29

## **Test Design**

Account		
Method	Parameter (type, name)	Return
login()	str email     str password	email, password

#### Characteristic Description & Partitions (Blocks)

- C1 : email is valid B1{true, false}
- C2 : password is valid B2{true, false}

## Test Requirements (Each Choice)

• TT, FF

#### Test Cases & Memo

- T1: {email="coopldh@gmail.com", password="888888888"} covers TT
- T2 : {email="gg@gmail.com", password="gg"} covers FF

#### **Test Case Expected Output**

- T1: {email="coopldh@gmail.com", password="88888888"}
- T2: {"Invalid Email or password."}

Event		
Method	Parameter (type, name)	Return
createEvent()	str eventName     str eventWhen	eventName, eventWhen

#### Characteristic Description & Partitions (Blocks)

- C1 : eventName is valid B1{true, false}
- C2 : eventWhen is valid B2{true, false}

#### Test Requirements (Each Choice)

• TT, FF(Infeasible)

#### Test Cases & Memo

T1: {eventName="EventTest!!!", eventWhen="11 May 01:16"} covers TT

#### **Test Case Expected Output**

T1: {eventName="EventTest!!!", eventWhen="11 May 01:16"}

Method	Parameter (type, name)	Return

	4 - 11	
editEvent()	<ol> <li>str eventName</li> <li>str eventWhen</li> </ol>	eventName, eventWhen
Characteristic D	escription & Partitions (Blocks)	
	ntName is valid - B1{true, false} ntWhen is valid - B2{true, false}	
Test Requireme	nts (Each Choice)	
• TT, FF(In	feasible)	
Test Cases & M	emo	
• T1 : {ever	ntName="EditTest???", eventW	hen="2017/06/13 02:37"} covers
Test Case Expe	cted Output	
• T1 : {ever	ntName="EditTest???", eventW	hen="2017/06/13 02:37"}
Method Parameter (type, name) Return		
Method	Parameter (type, name)	Return
Method  deleteEvent()	Parameter (type, name) none	Return  True/False (eventId exist)
deleteEvent()		
deleteEvent() Characteristic D	none	True/False (eventId exist)
deleteEvent()  Characteristic D  C1 : dele	none escription & Partitions (Blocks)	True/False (eventId exist)
deleteEvent()  Characteristic D  C1 : dele	none escription & Partitions (Blocks) te button is clicked - B1{true, fal	True/False (eventId exist)
deleteEvent()  Characteristic D  C1 : dele  Test Requireme	none escription & Partitions (Blocks) te button is clicked - B1{true, fal nts (Each Choice) asible)	True/False (eventId exist)

deleteEvent()  Characteristic D  C1 : delete  Test Requireme  T, F(Infeat  Test Cases & M  T1 : {} cor	none escription & Partitions (Blocks) te button is clicked - B1{true, fal nts (Each Choice) asible) emo vers T cted Output	True/False (eventId exist)
deleteEvent()  Characteristic D  C1: delete  Test Requireme  T, F(Infeat  Test Cases & M  T1: {} con  Test Case Expended	none escription & Partitions (Blocks) te button is clicked - B1{true, fal nts (Each Choice) asible) emo vers T cted Output	True/False (eventId exist)

likeEvent()	none	likeButton.text ("like", "unlike")	
Characteristic D	escription & Partitions (Blocks)		
C1 : like l	outton is cliked - B1{true, false}		
Test Requireme	nts (Each Choice)		
• T, F(Infe	asible)		
Test Cases & M	emo		
• T1:{} co	vers T		
Test Case Expe	cted Output		
• T1 : {"unl	ike"}		
Method	Parameter (type, name)	Return	
unlikeEvent()	none	likeButton.text ("like", "unlike")	
Characteristic D	escription & Partitions (Blocks)		
• C1 : unlik	ce button is cliked - B1{true, false	e}	
Test Requireme	Test Requirements (Each Choice)		
• T, F(Infeasible)			
Test Cases & Memo			
• T1 : {} covers T			
Test Case Expected Output			
• T1 : {"like"}			

Comment		
Method	Parameter (type, name)	Return

writeComment()	1. str text	comment text			
Characteristic Descri	ption & Partitions (Blocks)				
C1 : text is val	id - B1{true, false}				
Test Requirements (I	Each Choice)				
• T, F(Infeasible	• T, F(Infeasible)				
Test Cases & Memo					
• T1 : {text="Wr	ite Comment Test!!!"} covers	Т			
Test Case Expected	Output				
• T1 : {"Write Co	omment Test!!!"}				
Method	Parameter (type, name)	Return			
deleteComment()	none	True/False (commentId exist)			
Characteristic Descri	ption & Partitions (Blocks)				
C1 : delete button is clicked - B1{true, false}					
Test Requirements (Each Choice)					
• T, F(Infeasible)					
Test Cases & Memo					
• T1 : {} covers T					
Test Case Expected Output					

Status		
Method	Parameter (type, name)	Return

• T1 : {True}

createStatusWithImages()	<ol> <li>str statustext</li> <li>str statusImage</li> </ol>	Context, ImagePath
--------------------------	---	--------------------

#### Characteristic Description & Partitions (Blocks)

- C1 : statustext is valid B1{true, false}
- C2 : statusImage is valid B2{true, false}

#### Test Requirements (Each Choice)

• TT, FF(Infeasible)

#### Test Cases & Memo

T1: {statusInput="Create Status Test!!!", statusImage="moonmoon.gif"}
 covers TT

#### **Test Case Expected Output**

 T1 : {statusInput="Create Status Test!!!", statusImage= Image's fullPath include("moonmoon.gif")}

Method	Parameter (type, name)	Return
editStatus()	str statustext     str statusImage	Context, ImagePath

#### Characteristic Description & Partitions (Blocks)

- C1 : statustext is valid B1{true, false}
- C2 : statusImage is valid B2{true, false}

#### Test Requirements (Each Choice)

• TT, FF(Infeasible)

#### Test Cases & Memo

• T1 : {statusInput="Edit Status Test!!!", statusImage="nickyoung.gif"} covers TT

#### **Test Case Expected Output**

 T1 : {statusInput="Edit Status Test!!!", statusImage= Image's fullPath include("nickyoung.gif")}

Method	Parameter (type, name)	Return
deleteStatus()	none	True/False (statusId exist)

## Characteristic Description & Partitions (Blocks)

• C1 : delete button is clicked - B1{true, false}

## Test Requirements (Each Choice)

• T, F(Infeasible)

#### Test Cases & Memo

• T1 : {} covers T

## **Test Case Expected Output**

• T1 : {True}

Friends		
Method	Parameter (type, name)	Return
findFriends()	1. str name	followButton.text

## Characteristic Description & Partitions (Blocks)

• C1 : name is valid - B1{true, false}

## Test Requirements (Each Choice)

• T, F(Infeasible)

#### Test Cases & Memo

• T1 : {name="Red"} covers TT

## **Test Case Expected Output**

• T1 : {"unfollow"}

### **Profile** Method Parameter (type, name) Return 1. str avatar 2. str cover 3. str name avatarlsTheSame, 4. str about coverlsTheSame, name, about, editProfile() 5. str location location, phone, dob, sex 6. str phone 7. str dob 8. str sex

### Characteristic Description & Partitions (Blocks)

- C1 : avatar is valid B1{true, false}
- C2 : cover is valid B2{true, false}
- C3 : name is valid B3{true, false}
- C4 : about is valid B4{true, false}
- C5 : location is valid B5{true, false}
- C6: phone is valid B6{true, false}
- C7 : dob is valid B7{true, false}
- C8 : sex is valid B8{true, false}

#### Test Requirements (Each Choice)

• TTTTTTTT, FFFFFFF(Infeasible)

#### Test Cases & Memo

```
    T1: {avatar = 'marceline.png',
cover = 'babyFP.png',
name = '105598001',
about = 'Edit Profile About',
location = 'Edit Profile Location',
phone = '0912345678',
dob = '2000/08/07',
sex = 'Male'} covers TTTTTTTT
```

#### **Test Case Expected Output**

 T1 : {avatarIsTheSame = True, coverIsTheSame = True.

```
name = '105598001',
about = 'Edit Profile About',
location = 'Edit Profile Location',
phone = '0912345678',
dob = '2000/08/07',
sex = 'Male'}
```
